DETAILED ACTION

1. This action is responsive to the amendment, filed April 18, 2003.
2. The allowance of claims 1-20, 22, 24, 33, 35-54, and 56 is hereby withdrawn in view of newly discovered reference NEMZOW and new grounds of rejections. Any inconvenience is regretted.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1 recites the limitation "the most recent time period" . There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 3628

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 1-20, 22, 24-33, 35-54, and 56 are rejected under 35 U.S.C. 102(e) as being unpatentable over NEMZOW (US 2001/0011241).

NEMZOW et al discloses:

A computer-implemented system for managing financial transactions, a method for applying an exchange rate to convert a transaction from a first currency to a second currency, comprising:

receiving, by a computer system, a financial transaction, including a date and a transaction amount in the first currency (100);

accessing, by the computer system, an electronically stored plurality of historical exchange rates for the first currency with respect to the second currency, each exchange rate corresponding to a time period (110; paragraph [0050]);

responsive to the date of the received financial transaction corresponding to a time period of one of the historical exchange rates (paragraph [0051]);

automatically selecting, by the computer system, the historical exchange rate (paragraph [0052]);

Art Unit: 3628

responsive to the date of the received financial transaction not corresponding (360) to a time period of one of the historical exchange rates, automatically selecting, by the computer system, a historical exchange rate having the most recent time period among available historical exchange rates having time periods prior to the date of the received financial transaction (steps 100-150 of fig.2;);

automatically applying, by the computer system, the selected historical exchange rate to the received financial transaction, to derive a converted transaction amount in the second currency; and performing at least one of the steps of: storing the converted transaction amount in a storage medium; and outputting the converted transaction amount (paragraph [0049-0061];

storing the received financial transaction including the date, the transaction amount, and the selected exchange rate paragraph [0063].
